

Exercise - 05

Experiment on packet capture

tools: Wireshark

Capturing and Analyzing packets using Wireshark tool.

To Filter, capture, view, packets in Wireshark tool.
capture 100 packets from the Ethernet: IEEE 802.3 LAN
Interface and save it.

Procedure:

Select Local Area Connection in Wireshark
Go to capture automatically after too. packet
Then click start capture
Save the packets.

1. Create a filter to display only TCP/UDP packets inspect the packets and provide the flow graph.

procedure :

Select Local Area connection in Wireshark
Go to capture caption

Select Stop capture automatically after 100 packets.

Then click the Start capture

Search TCP packets in search bar

To see flow graph click Statistics flow graph.

Save the packets.

2. Create a filter to display only ARP packets and inspect the packets.

procedure :

Go to capture option

Select Stop capture automatically after 100 packets

Then click Start capture

Search ARP packets in search bar

Save the packets

1000

[illegible]

flow graph

procedure :

Go to Capture Option
Selection stop capture automatically after 100 packets

Then click start capture

Search dns packets in search bar

To see the flow graph click statistics
flow graph.

Result :

Capturing and Analyzing packets using ~~Wireshark~~ ^{Wireshark} are studied and execute successfully.
